Hands-On Technical Workshops

by Ron Beaufort

List of Courses

Based on our new **Problem/Solution** method of hands-on instruction, each course listed below is significantly more effective than the familiar Lecture/Lab format which is traditionally used for technical training. Rather than wasting time on tedious lectures or dull PowerPoint slide shows, all of the course material is presented in a workshop format through a series of hands-on exercises which each student performs on real-world equipment. By capitalizing on the learn-by-doing approach preferred by most technicians, these courses not only cover more material, they also improve the student's problem-solving and troubleshooting skills.

All of our courses are covered by our **100% money-back guarantee**. You'll be satisfied with the results of our training or you won't have to pay for it. Period.

Level 1 and 2 Skills for the PLC-5 Using RSLogix5 - Discrete and Analog Signals

P1540 5 days \$2250 per student **PLC-5 Boot Camp**

Level 1 and 2 Skills for the SLC-500 Using RSLogix500 - Discrete and Analog Signals

S1540 5 days \$2250 per student **SLC-500 Boot Camp**

Level 1 and 2 Skills for ControlLogix Using RSLogix5000 - Discrete and Analog Signals

C1540 5 days \$2250 per student **ControlLogix Boot Camp**

The PID Instruction for the PLC-5 - Troubleshooting Basic Process Control

P4040 5 days \$2500 per student

The PID Instruction for the SLC-500 - Troubleshooting Basic Process Control

S4040 5 days \$2500 per student

The PID Instruction for ControlLogix - Troubleshooting Basic Process Control

C4040 5 days \$2500 per student

RSLink Communication Software and Common Hardware for Programming

L1008 1 day \$500 per student

Cross-Train to PLC-5 from SLC-500 Using RSLogix5 Software

P2308 1 day \$500 per student

Cross-Train to SLC-500 from PLC-5 Using RSLogix500 Software

S2308 1 day \$500 per student

Basic Computer Skills for Technicians Using Microsoft Windows

F1008 1 day \$300 per student
